## 2. Konfigurasi System

### 3. Membuat model dan migration

#### Langkah 1 - Konfigurasi Koneksi Database

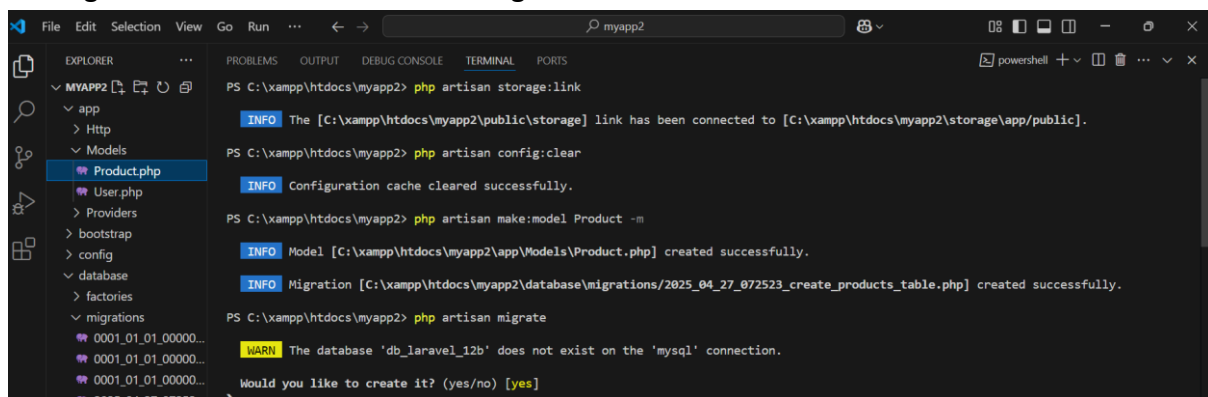

The screenshot shows the Visual Studio Code editor with the `.env` file open. The file contains configuration for a Laravel application, including database connection details and session settings. The Explorer sidebar on the left shows the project structure, with the `public` directory expanded. The Terminal panel at the bottom shows a message indicating that the storage link has been successfully connected.

```
12 # APP_MAINTENANCE_STORE=database

14 PHP_CLI_SERVER_WORKERS=4

16 BCRYPT_ROUNDS=12

39
40 CACHE_STORE=database
```

INFO The [C:\xampp\htdocs\myapp2\public\storage] link has been connected to [C:\xampp\htdocs\myapp2\storage\app\public].

#### Langkah 2 - Membuat Model dan Migration Di Laravel

The screenshot shows the Visual Studio Code editor with the `Product.php` file selected in the Explorer sidebar. The Terminal panel at the bottom shows the output of several Laravel Artisan commands executed in a PowerShell prompt. The commands include linking storage, clearing the configuration cache, creating a new model, creating a new migration, and running the migration. A warning message indicates that the database 'db\_laravel\_12b' does not exist on the 'mysql' connection, and the user is prompted to create it.

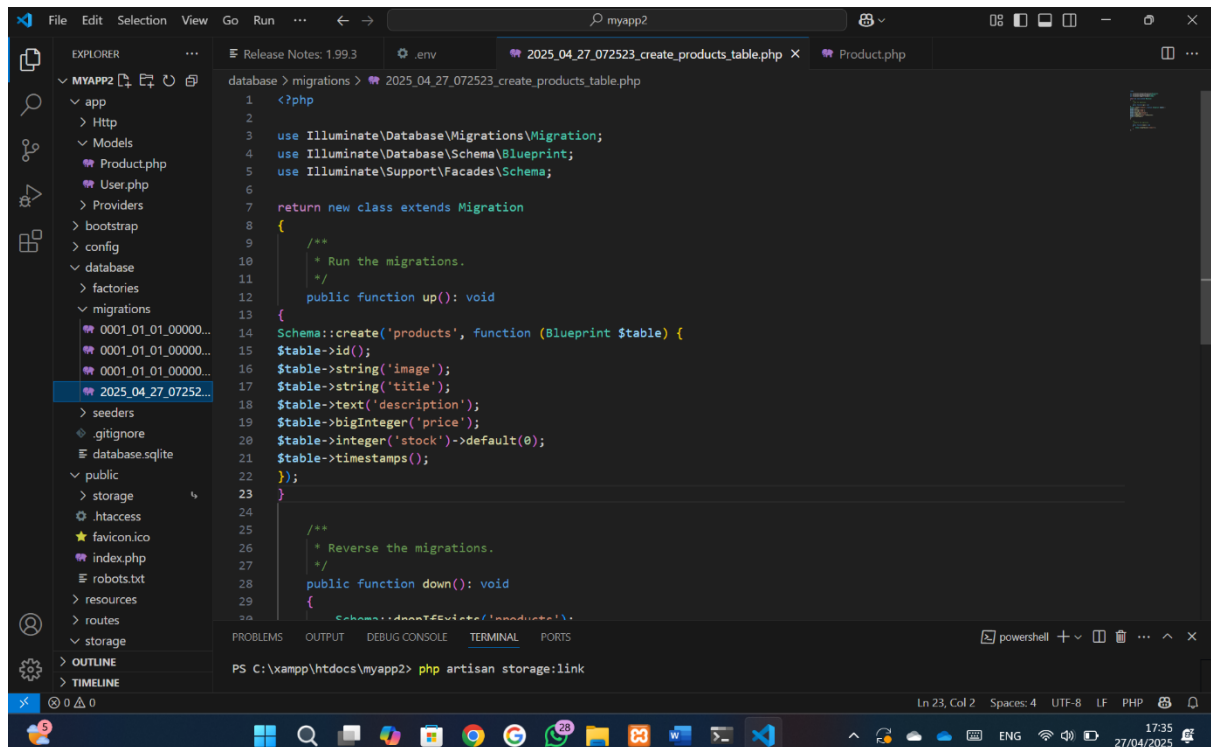

```
PS C:\xampp\htdocs\myapp2> php artisan storage:link
INFO The [C:\xampp\htdocs\myapp2\public\storage] link has been connected to [C:\xampp\htdocs\myapp2\storage\app\public].

PS C:\xampp\htdocs\myapp2> php artisan config:clear
INFO Configuration cache cleared successfully.

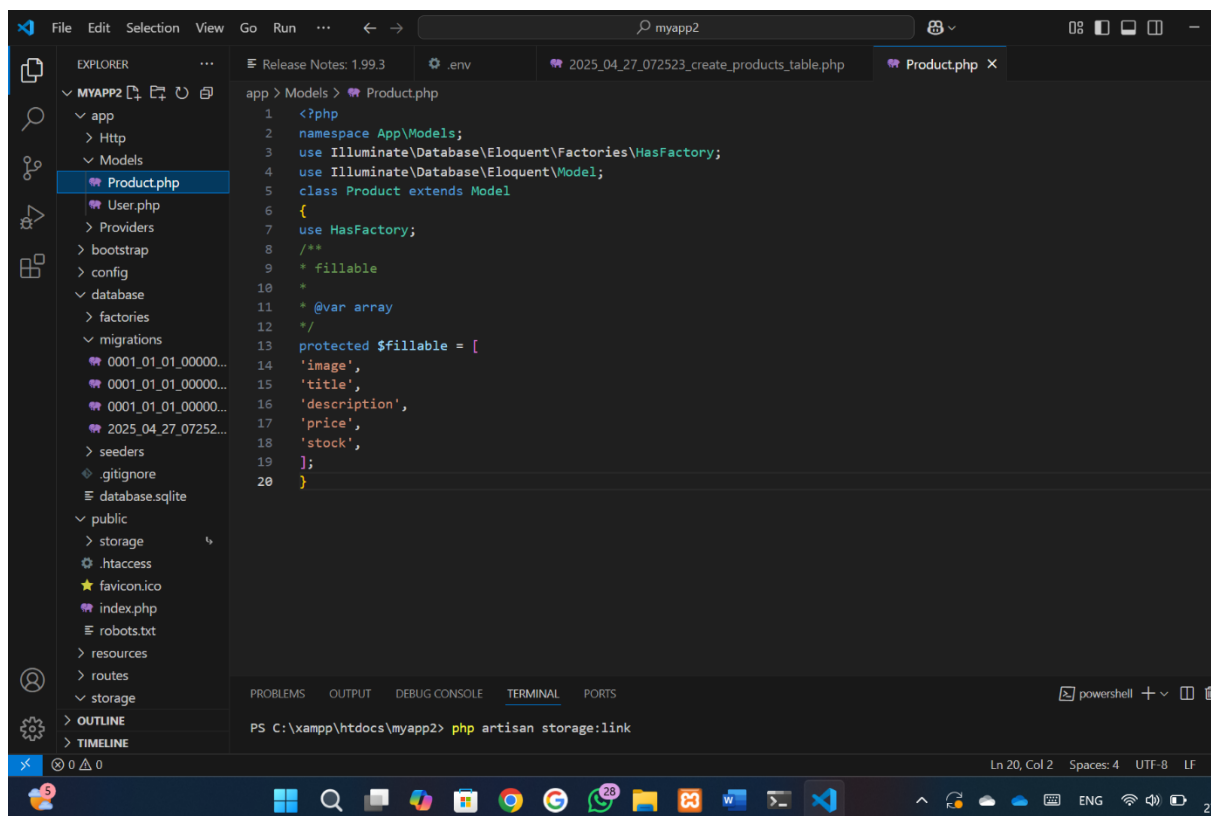

PS C:\xampp\htdocs\myapp2> php artisan make:model Product -m
INFO Model [C:\xampp\htdocs\myapp2\app\Models\Product.php] created successfully.
INFO Migration [C:\xampp\htdocs\myapp2\database\migrations\2025_04_27_072523_create_products_table.php] created successfully.

PS C:\xampp\htdocs\myapp2> php artisan migrate
WARN The database 'db_laravel_12b' does not exist on the 'mysql' connection.
Would you like to create it? (yes/no) [yes]
yes
```

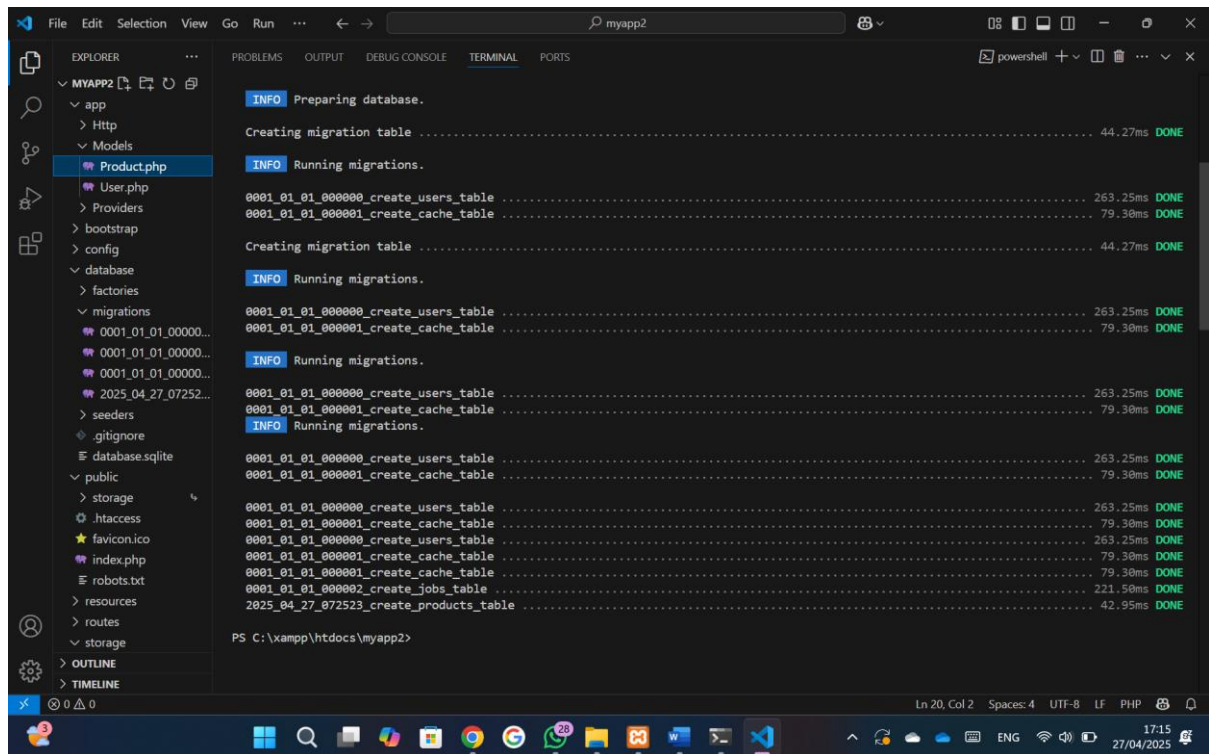

### Langkah 3 - Menambahkan Field / Kolom di Migration

### Langkah 4 - Konfigurasi Mass Assignment

## Langkah 5 - Menjalankan Migration

The screenshot shows the VS Code interface with the Explorer panel on the left displaying the project structure. The Terminal panel on the right shows the output of the migration command. The first three migrations are completed:

```
PS C:\xampp\htdocs\myapp2> php artisan migrate --seed

INFO: Preparing database.
